PRICING WORKSHEET

Price the project, not the hour. Answer these six before you send a number.

CLIENT _____ PROJECT _____

01 Scope

What exactly is included, and what isn't?

02 Their alternative

What would they do if you didn't exist? Wix, the nephew, a big agency, doing nothing?

03 The value to them

What is the problem costing them now? Write it in their words, not design words.

04 Your floor

(What you need to keep + business costs) ÷ 0.7 for taxes ÷ about 1,000 billable hours a year. Never quote below it.

05 The bundle

A starting price, a monthly line that keeps you in the relationship, and one or two add-ons tied to outcomes they care about.

06 Time check

Estimated hours × your floor × 1.25–1.5 for revisions and surprises. A sanity check, not the price you quote.

YOUR QUOTE $ _____ THEN $ _____ / MO
